Export To CSV

The screenshot shows the 'Export Available Cats' screen in the Whisker app. At the top, there's a teal header with a hamburger menu icon and the title 'Export'. Below the header, the title 'Export Available Cats' is centered. A search bar with the letter 'M' is visible. A list of cats is shown, with 'MJ' selected. The cat's details are: Domestic Medium Hair, Sex: Female, Age: 2y 10m. A modal dialog titled 'Export Options' is open, showing three options: 'Share CSV', 'Save to Device', and 'Cancel'. The 'Export to CSV' button is visible at the bottom of the screen.

Save To Device

Introduction

This user guide provides comprehensive instructions for using the Kitty of Angels mobile application for Android. This app allows users to browse available cats from the Kitty of Angels shelter in Los Angeles, search and filter cats by various criteria, view detailed cat profiles, apply for adoption, contact the shelter, and export cat data to CSV files. The guide walks through all app features with detailed step-by-step instructions as demonstrated in the actual application. Note that this application shows real cats that are available for adoption from Kitty of Angels. There is no guarantee that cats discussed as examples in this user guide will be available to view or test within the application. The existing logic will apply and scale to any future cats.

Installing the Application

Option 1: Firebase

Step 1

Visit the invitation link:

<https://appdistribution.firebase.google.com/pub/i/6b41574e0455883c>

*Figure 18: Firebase App Distribution***Step 2**

Enter your email and click “Sign up”.

*Figure 19: Firebase App Distribution 2***Step 3**

Open the email on your mobile device.

Figure 19: Email

Step 4

Click “Get started”, download the App Tester application from Firebase App Distribution, and then click “Accept invitation”. In this example, a WGU student email cannot accept this invitation, so I’ve accepted it with matthew@kittyofangels.org instead.

Figure 20: App Tester

Step 5

After clicking “Accept invitation”, you’ll see the KittyOfAngels app on the App Tester. Click “Open” to view the application.

Option 2: GitLab

Step 1

Visit my repository link: <https://gitlab.com/wgu-gitlab-environment/student-repos/mmor986/d424-software-engineering-capstone/-/tree/Working>

Step 2

Select the dropdown for “Code” and choose “Zip” under “Download source code”.

Figure 23: GitLab

Step 3

Right click the zip file and extract using your preferred tool to your preferred location.

Figure 23: GitLab

Step 4

Open “\d424-software-engineering-capstone-Working\KittyOfAngels” in your new location.

Double-click “KittyOfAngels.sln” to open the solution in Visual Studio.

Figure 24: Open Solution File

Step 5

Select “Trust and Continue”.

Figure 25: Trust and Continue

Step 6

Select “Release”, select “ARM64”, select your emulator or physical Android device. Start the application by clicking the “Run” button next to your device.

Figure 26: Visual Studio

Using the Application

Starting the App

1. Tap the Kitty of Angels app icon on your Android device to launch it.
2. The app will open with a splash screen displaying the Kitty of Angels logo in the center of a teal background.
3. After the splash screen, the app automatically loads the "Available Cats" gallery page.

Browsing Available Cats

1. The "Available Cats" screen displays a grid of cat photos with their names, sex, and age information.
2. Scroll up and down to view all available cats.
3. Each cat card shows the following:
 - A cover photo of the cat is shown.
 - The cat's name is shown: e.g., MJ, Howie, or Coco Bean.
 - The sex is shown as Male or Female.
 - The age is shown in years and months: e.g., 2y 10m.
4. All cats displayed have a status of "Available Foster" which can be seen in their detailed profiles.

Searching for Cats

1. At the top of the "Available Cats" screen, locate the search bar labeled "Search by name".
2. Tap in the search field and type the beginning of a cat's name.

3. The cat list automatically filters as you type to show only cats whose names start with those letters. The following examples are based on the existing cats in the application walkthrough images and video.

- For example:
 1. Typing "M" will filter to show cats like "MJ" and "Mocha Latte".
 2. Adding more letters continues to refine the search.
 3. Typing "H" would show cats like "Howie" and "Honey".
 4. Typing "Ho" would continue to show both "Howie" and "Honey".
 5. Typing "How" would filter to only show "Howie".

4. To clear your search and see all cats again, delete the text in the search bar.

Filtering Cats

1. On the "Available Cats" screen, tap the teal "Filters" button in the top right corner.
2. The "Filter Cats" dialog appears with three filtering options:
 - Breed is the first option. Tap to select from available cat breeds: e.g., "Domestic Medium Hair", or "Domestic Shorthair".
 - Age is the second option. Tap to select an age range, or "Any" for all ages.
 - Sex is the third option. Select either Female or Male by tapping the respective radio button.
3. After making your selections, tap the "Apply" button to filter the cat list.
4. The filtered list will show only cats that match all of your selected criteria. The following examples are based on the existing cats in the application walkthrough images and video.
 - For example:

1. Selecting "Domestic Medium Hair", "Any" age, and "Female" would only show only MJ.
2. Selecting "Domestic Shorthair", "Any" age, and "Male" would only show Howie.
3. Selecting any breed, "Any" age, and "Female" would show all female cats.
5. To clear all filters, tap the "Reset" button within the filter dialog, then tap "Apply".

Viewing Cat Profiles

1. Tap on any cat's photo or name in the main listing to view their detailed profile.
2. The profile page shows the following:
 - A photo carousel of the cat is shown with dot indicators below showing which image you're viewing.
 - The cat's name is shown at the top.
 - A teal status tag (e.g., "Available Foster") is shown.
 - The sex, breed, and age information are shown.
 - An "Attributes" section is shown with tags describing the cat's characteristics.
 - An "About" section is shown with a detailed description of the cat's personality and history.
3. To navigate through multiple photos of the cat, swipe left or right on the image area.
4. Scroll down to read the entire profile and see all information.
5. To return to the Available Cats listing, choose either of navigation:
 - Tap the back arrow in the top left corner.
 - Use your device's back gesture by swiping from the left edge of the screen.

Applying for Adoption

1. While viewing a cat's profile, scroll to the bottom of the page.
2. Tap the teal "Apply to Adopt" button.
3. The app will open your device's default web browser to the ShelterLuv adoption application form.
4. On the form, you will need to manually enter the name of the cat you're interested in adopting.
5. Complete the rest of the application form with your information. Do not submit test adoption forms. This is a live application.
6. After submitting the form, return to the app using your device's back button or recent apps menu.

Contacting the Shelter

1. While viewing a cat's profile, scroll to the bottom of the page.
2. Tap the "Contact Kitty of Angels" button (white with teal border).
3. If you're signed into your email, your device's email app will open with a pre-populated email:
 - To: info@kittyofangels.org
 - Subject: Inquiry about [Cat Name]
 - Body: "I'm interested in learning more about [Cat Name] (ID: [ID number])."
4. Add any additional information you'd like to include in your inquiry.
5. Send the email to contact the Kitty of Angels about the specific cat.
6. After sending or saving the email draft, return to the app.

Accessing the App Menu

1. Tap the hamburger menu icon (the three horizontal lines) in the top left corner of the screen.
2. The flyout menu will appear from the left side, showing the following:
 - “Available Cats” is shown.
 - “Export” is shown.
 - “Follow Us” and social media icons are shown.
3. Tap any menu item to navigate to that section of the app.
4. Tap outside the menu area to close it without making a selection.

Following Social Media

1. From the flyout menu, locate the "Follow Us" section at the bottom.
2. Tap one of the social media icons:
 - Facebook (blue circle with "f")
 - Instagram (pink circle with "IG")
 - X/Twitter (black circle with "X")
3. The app will open your device's web browser to the corresponding Kitty of Angels social media page.
4. After viewing the social media page, return to the app using your device's back button or recent apps menu.

Exporting Cat Data

1. From the flyout menu, tap "Export" to open the Export page.
2. The "Export Available Cats" page shows a list of all available cats.

3. You can search for specific cats using the search field at the top, which works the same way as the search on the main page.
4. To export all cats or the currently filtered list if you've used search, tap the "Export to CSV" button at the bottom of the screen.
5. A dialog will appear with these two options:
 - “Share CSV” opens your device's share menu to send the file via email, messaging apps, etc.
 - “Save to Device” saves the file to your device's storage.
6. If you choose "Save to Device", then the following will occur:
 - A confirmation message will appear showing the file was saved to app storage.
 - On a physical device (not the emulator), you should also receive a notification about the downloaded file.
7. If you choose "Share CSV", then you can proceed with the following:
 - You can view your device's share dialog opening.
 - You can select your preferred method to share the CSV file (email, Google Drive, etc.).
 - You can complete the sharing process in the selected app. This process is detailed through screenshots in the application walkthrough tables.

CSV File Contents

The exported CSV file contains the following:

1. It contains a header with "Export Available Cats" and the date/time of export.
2. It contains column headers: Name, ID, Breed, Color, Sex, Age, and Status.
3. It contains one row for each available cat with all their information.
